Please come and meet members of our team at a drop-in session at:

**The Hampshire Arms,
Pankridge Street,
Crondall, Farnham,
GU10 5QU**

Thursday 8 May 2025

Between 1.30PM – 6.30PM

Dear Resident,

We would like to inform you of a proposed battery energy storage system (BESS) development being put forward by RE Projects Development Ltd (REPD) on Land at Bowenhurst Farm, Crondall, Farnham, GU10 5HP.

The proposed development is located within a predominantly industrial area to the west of Bowenhurst Lane. It would provide capacity to store up to 100 megawatts (MW) of electricity for a period of about 40 years.

BESS facilities are a vital technology in decarbonising the energy network. They are used on the UK power grid to provide balancing services, storing excess electricity during periods of low demand and releasing it back into the grid when needed. This capability allows effective integration of renewable energy sources.

The key benefits of the proposed development include:

- **Grid balancing:** Providing a range of balancing services locally and nationally to help the system operate more efficiently and reliably.
- **Improved biodiversity:** Proposed new planting and landscaping will enhance the biodiversity of the site.
- **Advancing Clean Power 2030:** The project is in strategic alignment with the Government's Clean Power 2030 Action Plan which will deliver economic growth, national energy security, and improve standards of living.

We welcome your feedback on this proposal and look forward to hearing from you.

Yours faithfully,
The Bowenhurst BESS Team
